

Social Skills Development and STEM for a better life

MULTIPLIER EVENT IN HUNGARY

On April 24, 2023, the first Multiplier Event was held at Szent Miklós Görögkatolikus Iskola in Edelény to showcase the outputs of the "Sober-Social Skills Development and STEM Orientation for a Better Life" project, co-funded by the Erasmus+ Program of the European Union.

INTERNATIONAL COOPERATION

Óbuda University, in collaboration with partners from Hungary, Belgium, Poland, and Turkey, has developed an innovative digital-based Complex Development Program for school education that focuses on the basic skills development of underprivileged and SEN (special education needs) children.

TOGETHER WITH TEACHERS AND PARENTS

The event was attended by teachers and parents who were interested in learning about the methodology and tools developed by the Sober Project. The project offers both printed materials and an online platform that provides a comprehensive program for teachers and parents to support pupils in basic skills development. By intervening early in the learning outcomes of disadvantaged students, early school leaving can be prevented.
